

We are an innovative project planner in the field of renewable energies, specialized on biomethane. Our target is to support our clients - from development and construction to operational management. In Germany we occupy a leading market position in the biomethane market with our plants in the "Biogas Pool for Public Utilities" and our wide range of technical and commercial services. Through the connection to our parent company, the Neuman & Esser Group (NEA), we are represented internationally at over 23 locations worldwide. Our market is growing fast in Italy - in the area of fuel production based on biomethane. We now want to expand these market opportunities - with you!
